Study Information and Statement of Informed Consent for Adult Participants

Thank you for your interest in participating in our study. Please take your time to read this text carefully. If you have any questions, we are happy to answer them. By agreeing, you consent that you have read the information presented and that you are willing to participate in the study.

1. Aim of the study

In this study, we are interested in people's judgments about everyday social scenarios.

2. Procedure and content of the study

In this study, you will read about a social scenario. You will then be asked a series of questions and for your opinion on the scenario. In the end, you will be asked to provide demographic information. Further information regarding the task will be provided later.

3. Are there any risks involved?

Participating in this study is associated with no risks.

4. What will happen to the information and data collected?

This study is a research project of the [.....]. The data collected will be used for research purposes only. The data collected will be used for research purposes only. During the data analysis, your data may be shared with our collaborators. Your Prolific ID will be not be saved in our dataset.

The study data may also be made publicly accessible via research databases or scientific publications (typically via the Internet). This sharing of data makes it possible for other

researchers to check or replicate the results of the study and enhances the quality of scientific research. The study data may also be used for new research questions going beyond the purposes of this particular study. Please note that once study data are publicly accessible, further distribution by others cannot be ruled out as this is beyond the area of influence or responsibility of the MPI for Human Development. Therefore, as a matter of principle, study data are only transferred or made publicly accessible without your Prolific ID.

5. Participation is voluntary

Participation in this study is voluntary. You may withdraw from the study at any time without giving any reason and without any negative consequences. Please note that compensation will only be provided to participants who complete the entire study; if you choose to withdraw or do not finish the study, you will not receive compensation. You may also withdraw your consent to data processing and usage at any time with effect for the future and without negative consequences. For further questions or requests to withdraw your data, please contact [.....].

6. Consent

This document has informed you about participation in this study on idea generation. The study involves generating ideas about a social scenario and making a series of judgments about these ideas and the scenario. It lasts approximately 7 minutes.

- ☐ I **consent** to participate in the study and agree to the collection, storage, and use of my data as described above.
- ☐ I **do not consent** I consent to participate in the study and agree to the collection, storage, and use of my data as described above.

6. Consent

This document has informed you about participation in this study on idea generation. The study involves generating ideas about a social scenario and making a series of judgments about these ideas and the scenario. It lasts approximately 7 minutes.

Comprehension Check1

The color test you are about to take in is very simple, when asked for your favorite color you must select 'Red'. This is an attention check.

Based on the text you read above, what color have you been asked to enter?

- ☐ Blue
- ☐ Green
- ☐ Yellow
- ☐ Red

Comprehension_Check2

Unfortunately, this response was not correct.

Please try again.

The color test you are about to take in is very simple, when asked for your favorite color you must select 'Red'. This is an attention check.

Based on the text you read above, what color have you been asked to enter?

- ☐ Blue
- ☐ Green

- ☐ Red

Instructions_1

In this study, you will read three short scenarios.

For each scenario, you will have to come up with some actions that the agent could do.

After that, you will answer some questions about the scenario and the actions that you came up with.

Please read the scenarios carefully.

Select the correct description of your task:

- ☐ I will be asked questions about the actions that I came up with.
- ☐ I will be asked questions about actions that ChatGPT-4 came up with.

Instructions_2

Unfortunately, this response was not correct.

Please try again.

For each scenario, you will have to come up with some actions that the agent could do.

After that, you will answer some questions about the scenario and the actions that you came up with.

Please read the scenarios carefully.

Select the correct description of your task:

- ☐ I will be asked questions about the actions that I came up with.
- ☐ I will be asked questions about actions that ChatGPT-4 came up with.

Condition2_Scenario1

Please read the following scenario:

Heinz's wife has recently fallen ill and needs an expensive medication that is not covered by her medical insurance. They don't have the money needed to purchase the expensive prescription, but they know that it's vital for her to have it if she is going to recover.

In this situation, what are some things you believe Heinz could do? *Please list 5.*

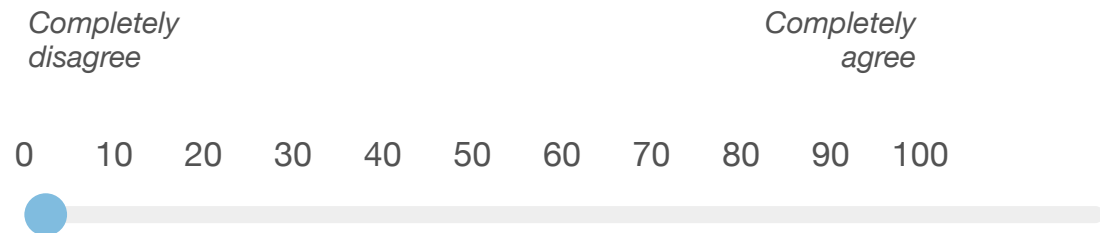

Now, you will read about what Heinz decided to do.

Heinz decides to search for the medication on the black market.

After doing this, Heinz' wife gets the medication later than necessary, and she soon gets more ill.

Please rate how much you agree with the following statement:

"Heinz should be blamed for his wife getting more ill."

Consider one of the things you believed Heinz could do:

`#{q://QID779/ChoiceTextEntryValue/4}`

In Heinz's situation:

How **probable** is it that someone would do this?

How **morally acceptable** is it to do this?

How **normal** is it to do this?

Consider one of the things you believed Heinz could do:

`#{q://QID779/ChoiceTextEntryValue/5}`

In Heinz's situation:

Least Most
0 10 20 30 40 50 60 70 80 90 100
