Study Information and Statement of Informed Consent for Adult Participants

Thank you for your interest in participating in our study on “**Judgments in Social Scenarios**”. Please take your time to read this text carefully.

1. General Information about the Study

This study is a research project of the **Max Planck Institute for Human Development (MPIB)**. In this study, we are interested in your judgments about everyday social scenarios. The study is being conducted by **Dr. Lara Kirfel** (kirfel@mpib-berlin.mpg.de). The responsible ethics committee has no ethical objections to the study.

2. Procedure and Content of the Study

You will read a social scenario and be asked to read some ideas generated by participants that took part in a previous study. You will then be asked a series of questions and for your opinion on the scenario. We will also ask you to provide us with some background information (e.g., age, gender, race/ethnicity). In this study, you will not allowed to switch tabs.

3. Risks and Compensation

There are no major risks involved in this study.

The study will take about **9 minutes** to complete. You will receive compensation of **£1.35**. If you decide to voluntarily terminate your participation, you will receive **£0**. If you switch tabs more than once, the survey will end and you will not be paid.

4. Data Handling and Confidentiality

All data collected from you will be stored and scientifically analyzed in accordance with data protection laws (EU General Data Protection Regulation [GDPR], German Federal Data Protection Act). The study will be hosted on [Qualtrics](#).

No contact information will be collected in the study. If you choose to participate in the study, we will link broad information about your age, gender and ethnicity to your answers throughout the survey. We will not store your Prolific ID. The study data will be stored for at least 10 years in accordance with the Good Scientific Practice of the German Research Foundation and the rules of the Max Planck Society.

At the end of the data collection, it is planned to upload the research data (excluding your Prolific ID) to the Open Science Framework [Open Science Framework \(OSF\)](#) for archiving and further scientific use. This will allow other researchers to verify or replicate the results of the study and improve the quality of scientific research. The study data can also be used for new research questions beyond the purpose of this study. The Open Science Framework is located outside the European Union. Once uploaded there, the data will be made publicly available worldwide, i.e., the data can be viewed, downloaded, and used by interested parties. This also means that the data leaves the scope of European data protection law and that you may not be able to enforce your rights as a data subject. From the time of publication on the platform, the use of this data can no longer be controlled, subsequently restricted or deleted anywhere, and this is beyond the control or responsibility of the MPIB.

The results of the study will only be published without direct reference to you. If the results of the study are published, your identity will remain confidential. This means that it will not be possible to tell from the results which person provided the information, nor will it be possible to tell from the research data that you took part in a study, unless you have given separate consent for personal publication.

Results will only be published anonymously without direct reference to you.

5. Legal Basis

The legal basis for the processing of your data is your consent, in accordance with Article 6(1)(a) of the GDPR. You may withdraw your consent at any time with effect for the future. You may also withdraw your consent to the processing and use of your data at any time without negative consequences.

6. Data Subject Rights

- Right of access (Art. 15 GDPR)
- Right to rectification (Art. 16 GDPR)
- Right to erasure (Art. 17 GDPR)
- Right to data portability (Art. 20 GDPR)
- Right to restriction of processing (Art. 18 GDPR)

- Right to object (Art. 21 GDPR)
-

Complaints can be directed to the Bavarian Data Protection Authority, P.O. Box 606, 91511 Ansbach, Germany.

7. Voluntary Participation

Participation is voluntary. You may withdraw at any time without giving a reason or facing any negative consequences. To withdraw, contact the researcher through Prolific or email [Dr. Lara Kirfel](#). Since no personally identifiable data is collected, your data cannot be linked to you after the study's completion, and withdrawal of your data afterward is not possible.

8. Consent to Participate

1. I have been informed of the “Judgments in Social Scenarios” study, its procedure, significance, scope and risks, and I have read and understood the study information.
2. I have had the opportunity to clarify any questions.
3. I have the right to request further information about the study at any time.
4. I voluntarily agree to participate in the study as described in the study information.
5. I have been informed that I can withdraw from this study at any time without any penalty.

- ☐ Yes, I agree
- ☐ No, I don't agree

9. Data Protection Consent

1. I have read and understood the study information.
2. I have been informed that my consent is voluntary and that I may withdraw it before the code list is deleted. I have also been informed of my further rights to information, correction, deletion, data transferability, as well as complaint and contact options.
3. I consent to the collection, processing, and analysis of my data by the Max Planck Institute for Human Development in the research project of the “Judgments in Social Scenarios” study. The collected data may be used by the Max Planck Institute for Human Development in the context of scientific research for the purpose explained.
4. I consent to research data being stored without mentioning my name for the publication of research results in scientific journals for their review (reanalyses).
5. I consent to my anonymized research data being analyzed for related research questions for scientific purposes as described in the study information.
6. I consent to my anonymized research data being available for scientific analysis as described in the study information even after the study has ended.
7. I consent to my anonymized research data being uploaded to the Open Science Framework as described in the study information and used worldwide.
8. I consent to my anonymized research data being available for scientific analysis in the Open Science Framework as described in the study information, even after the end of the study.

- ☐ Yes, I agree
- ☐ No, I don't agree

Warning

Important Notice Before You Begin

To ensure the integrity of this study, we kindly ask that you do **not** switch browser tabs, navigate away from the survey, or copy/paste any content into the survey form. Our system automatically detects such actions.

If any of these behaviors are detected, your participation will be flagged as compromised, and you will not **be able to receive compensation, even if you complete the study.**

Please confirm that you understand and agree to these terms before continuing.

Agreement

- ☐ I understand that switching tabs or copy/pasting content during the survey will result in disqualification and I will not receive compensation.

Comprehension Check1

The color test you are about to take in is very simple, when asked for your favorite color you must select 'Red'. This is an attention check.

Based on the text you read above, what color have you been asked to enter?

- ☐ Blue
- ☐ Green
- ☐ Yellow
- ☐ Red

Comprehension_Check2

Unfortunately, this response was not correct.

Please try again.

The color test you are about to take is very simple, when asked for your favorite color you must select 'Red'. This is an attention check.

Based on the text you read above, what color have you been asked to enter?

Instructions_1

In this study, you will read three short scenarios.

For each scenario, you will see five possible actions the protagonist could take. **These actions were generated by ChatGPT-4o.**

After reading the scenario and the actions, you will answer some questions about them.

Please read the scenarios carefully.

Select the correct description of your task:

- ☐ I will be asked questions about the actions that participants in a previous study came up with.
- ☐ I will be asked questions about actions that ChatGPT-4o came up with.

Instructions_2

Unfortunately, this response was not correct.

Please try again.

In this study, you will read three short scenarios.

For each scenario, you will see five possible actions the protagonist could take. **These actions were generated by ChatGPT-4o.**

Scenario1

Please read the following scenario:

Heinz's wife has recently fallen ill and needs an expensive medication that is not covered by her medical insurance. They don't have the money needed to purchase the expensive prescription, but they know that it's vital for her to have it if she is going to recover.

Reminder:

Heinz's wife has recently fallen ill and needs an expensive medication that is not covered by her medical insurance. They don't have the money needed to purchase the expensive prescription, but they know that it's vital for her to have it if she is going to recover.

In this situation, here are five actions that Chat-GPT believed Heinz could do.

\${lm://Field/1}

\${lm://Field/2}

\${lm://Field/3}

\${lm://Field/4}

\${lm://Field/5}

Now, you will read about what Heinz decided to do.

Heinz decides to search for the medication on the black market.

After doing this, Heinz' wife gets the medication later than necessary, and she soon

gets more ill.

Please rate how much you agree with the following statement:

"Heinz should be blamed for his wife getting more ill."

AI Attitudes_End

In the following, we would like to learn more about your personal opinions and attitudes.
Please rate the following statement:

"I consider AI-generated suggestions as viable options."

"I have strong negative emotions about AI."

“I would rather avoid technologies that are based on AI.”

Demographics and Feedback

Finally, please answer these short demographic questions about yourself.

Your answers to these questions are very helpful, and are for research purposes only. Remember that your responses are entirely anonymous. If you feel uncomfortable with a question in this section, you can leave the question blank.

What is your age?

What gender do you identify as?

- ☐ Male
- ☐ Female
- ☐ Non-Binary

- ☐ Other
- ☐ Prefer not to say

I identify my ethnicity as (select all that apply)

- ☐ Asian
- ☐ Black/African
- ☐ Caucasian/White
- ☐ Hispanic/Latinx
- ☐ Middle Eastern or Northern African
- ☐ Alaskan or American Indian
- ☐ Native Hawaiian or Pacific Islander
- ☐ Multiethnic
- ☐ Prefer not to disclose
- ☐ Other
